APL Fulfillment Services

Providing Fully Integrated Technology and Services Across All Industries

APL Fulfillment Services delivers integrated financial and technology solutions across all industries. With 25+ years of expertise, we provide secure, scalable, turnkey solutions — including in-vehicle mobile technologies, hardware, and professional services.

Markets & Industries

APL Fulfillment supports industries like manufacturing, healthcare, utilities, public safety, and transportation. With expertise in hardware, software integration, and rugged technology, we can deliver solutions designed to fit your unique operational needs.

Financial Services

APL Fulfillment Services empowers businesses with strategic financial solutions, including equipment leasing, hardware buyback programs, and working capital loans. Our tax-advantaged leasing, deferred payments, and tailored financing options help organizations overcome budget constraints, secure critical resources, and drive innovation.

Rugged Mobile Hardware Solutions

Designed to perform in the harshest environments, our rugged mobile hardware solutions feature reliable laptops, tablets, handhelds, and smartphones. These resilient devices are crafted to resist impacts, extreme temperatures, and challenging work settings.

Body-Worn and In-Vehicle Cameras

Capture essential evidence with confidence using our reliable body-worn and in-vehicle camera systems. Built to support a wide range of use cases and budgets, these solutions integrate advanced hardware, intuitive software, and secure data storage.

Servers and Network Security

Our server and network security solutions keep your data protected and your systems connected without interruption. Engineered with advanced hardware and software, they create a dependable infrastructure that defends against evolving threats.

Software and Licensing

Our software and licensing solutions center on powerful tools and applications built around your specific requirements. From managing devices to deploying specialized field software, we offer adaptable licensing models that scale with your operations.

Maintenance and Warranties

Our comprehensive maintenance and warranty services keep your technology operating at peak performance. Proactive upkeep and prompt repairs reduce downtime and ensure your devices function reliably.

Printers and Scanners

Built for demanding environments, our rugged printers and scanners deliver reliable, high-speed performance wherever you work. These devices simplify tasks like document processing, barcode scanning, and data capture, helping to improve workflow efficiency and keep operations moving without interruption.

Hardware Solutions

Our extensive selection of high-performance hardware is designed to meet the toughest demands. Whether you need rugged laptops, mobile devices, or state-of-the-art surveillance equipment, we partner with top-tier manufacturers to provide technology that is customized to fit your specific needs.

Technology Buyback

Turn retired technology into new opportunities through our buyback programs. We assist organizations in responsibly disposing of or repurposing older equipment, ensuring compliance with environmental regulations while freeing up funds for future upgrades.

Connectivity Solutions

Consistent, secure connectivity is vital for modern mission-critical work. Our mobility and networking solutions ensure your teams stay connected. From mobile routers and wireless systems to robust cloud infrastructure, we provide the tools needed to drive efficiency and real-time responsiveness.

Software Solutions

Enhance your operations with software built to optimize workflows and boost efficiency. Our offerings span command and control systems, cybersecurity solutions, and cloud-based platforms tailored to your needs.

Project Management and Logistics Services

Successful technology deployment requires precise coordination and expert execution — and we provide both. From procurement and planning to installation and rollout, our comprehensive services are designed to ensure a smooth, efficient implementation.

Deployment and Installation Services

We specialize in tailored technology deployment and vehicle installation services that cater to the specific requirements of government and commercial fleets. Whether equipping your vehicles with state-of-the-art technology at our fleetTEC headquarters in Braselton, Georgia, or through our mobile teams, we provide solutions that keep your fleet operational and ready for any mission.

Technology Services

We offer customized technology services that provide innovative solutions to meet your organization's specific needs. Our expert consultants work closely with you to assess your current technology infrastructure and create a strategic roadmap that aligns with your operational objectives.

IT Services

We provide a complete range of IT services to support organizations at every stage of their technology journey. Whether it's IT consulting, project planning, staffing augmentation, or managed services, our solutions are tailored to your unique needs.

Why Choose APL Fulfillment Services?

Organizations trust APL for our flexibility, reliability, and expertise. Our centrally located facilities offer access to 81 million people within a 400-mile radius. With advanced security, cutting-edge technology, and tailored service models, we ensure your assets are protected and efficiently managed.

What Customers Say About Working With APL Fulfillment Services

"Working with APL, I was able to implement a fully integrated, end-to-end technology solution within my agency and put it into operational use. This affordable annual rental model utilizing operational budget funding eliminated the need for a significant capital budget expense, saving us both time and delays in the approval process."

— Administrative Captain, Sheriff's Office, Georgia

Our Team

With decades of experience in financial services, logistics, and IT asset management, our team is committed to delivering personalized solutions. Certified project managers, leasing specialists, and industry experts collaborate to provide exceptional support, from consultation to full-scale implementation.

Providing an As-a-Rental Model to Procure Businesses Infrastructure on a Subscription Basis Rather Than Purchasing and Owning Them Outright
